ProSkin60 Facial

£55.00

The results with a Dermalogica skin treatment are unlike anything else in the industry.

Treatments involve exfoliation, double cleanse, extractions, tailor-made customised massage and masque.

With products that are unequalled, your skin will be glowing, more luminous, hydrated, in its optimum condition, the best skin you've ever had.

The science of ionisation drives active ingredients faster and further into the skin using ultrasonic, microcurrent and LED light therapy. Immediate results are felt and seen even after just one treatment.

ProPower Peel

£85.00

Dermalogica's fastest and strongest peel yet, the ProPower Peel provides bespoke custom peels with each treatment.

When it comes to chemical peels, Dermalogica has a unique perspective. Promoting overall skin health is one of Dermalogica's core values.

Regular resurfacing is crucial to accelerate cell turnover and renewal rates, so peels that are more frequent and less invasive are preferable to those that push the skin to the point of severe inflammation.

ProPower Peels contain lactic acid, glycolic acid, salicylic acid and mandelic acid.

Chemical peels require a skin patch test at least 24 hours prior to treatment
